ISB Health Clinic: Information about novel coronavirus

Posted on January 26, 2020 by ISB Parent Portal

ISB is committed to the Health and Safety of its community.

We understand there could be questions about the novel coronavirus that has been reported in Wuhan and other parts of China.

We continue to monitor the spread of the novel coronavirus, risk assess prior to our trips, and work closely with International SOS, who update us daily.

Symptoms

Symptoms of the novel coronavirus are similar to influenza and respiratory tract infections and include fever, fatigue, sore throat, dry cough, and breathing difficulty as the disease progresses.

More Information

Please find attached an announcement from OSAC with further information about preventive measures, travel advice and the virus itself.

We would like to remind parents not to send their child to school if they are unwell and to seek medical attention.

Given our highly mobile community, it is always good practice to report your travel history to your doctor and to review the travel advice for the areas you are traveling to.
